THE ANGELS' SONG.

It came upon the midnight clear.

That glorious song of old,

From angels bending near the earth

To touch their harps of gold;

"Peace on earth, good-will to men

From Heaven's All-gracious King."

The world in solemn stillness lay

To hear the angels sing.

Still through the cloven skies they come,

And still their heavenly music floats

O'er all the weary world.

Above its sad and lowly plains

They bend on hovering wing.

And o'er the babel sounds

The blessed angels sing.

But with the woe of sin and strife

The world has suffered long;

Beneath the angel strain have rolled

Two thousand years of wrong;

And man at war with man, hears not

The love-song which they bring;

Oh! hush the noise, ye men of strife,

And hear the angels sing!

And ye, beneath life's crushing load,

Whose forms are bending low,

Who toil along the climbing way

With painful steps and slow,

Look now! for glad and golden hours

Come swiftly on the wing;

GERMAN GIRLS.

At a very early age the child is placed

in a "kindergarten" school, and later,

if of well-to-do parents, she is sent to a

young ladies' seminary. Here she is in-

structed not only in her own language,

but also in French, English and perhaps

Italian; music, drawing and painting

are not forgotten; great pains are taken

to instruct her in English and German

literature, while mathematics and the

sciences are neglected or soon dropped.

When about eighteen years of age she is

confirmed. Finally, she leaves school

and enters society with her mother. It

would be deemed improper for a young

lady, or even two, to attend any enter-

tainment or visit any place of amuse-

ment without being accompanied by a

parent or an elderly person, and as for

traveling alone, that is entirely out of

the question. Should a lover aspire to

her hand, he consults her parents on

the subject, and makes them the medi-

ators. If all is satisfactory, he makes

her a present of a plain gold ring, and

places one of the same kind on his own

finger. When all is arranged they pro-

ceed to the mayor's office and inform

him of the engagement, when it is regis-

tered and announced in the city papers.

Printed notices are also sent to friends,

and the happy couple appear arm in

arm on the street. After the engage-

ment he can see the young lady alone

and take her occasionally to the theater

or other place of amusement. After

marriage, the pair are in a measure in-

dependent of each other, both pursuing

their own peculiar amusements, he read-

ily succumbing to the fascinations of

billiards and beer.

Miss Grundy, in the Boston Transcript

tells a good story of the coolness with

which some women conduct themselves

in Washington. A lady who was giving

a party was astonished at the entrance

of a party of women, the leader of whom

asked with utter nonchalance, "What

is your name?" The hostess, though

taken by surprise, answered courteously,

and the other said coolly: "We are

strangers seeing the sights of Washing-

ton, and we heard music and dancing

here as we were passing and thought

we'd drop in so we could tell our folks

at home how you folks live here. We

read so much in the papers about your

gay doings and all the corruption."

Nevertheless the hostess treated the par-

ty politely and offered them refresh-

ments, of which they ate heartily, and

left after a prolonged stare.

Above all things in this world, do I

value the love of my dear mother," said

a youth who stands on street corners

for a living. "God bless you, young

man, for that noble sentiment," said a

missionary. "Having so much respect

for a mother, you need no other recom-

mendation to successful men who will

said you." "Yes," continued the young

man, "mother feeds me, clothes me,

does my washing, and has been doing it

for twenty years. I don't know what I

should do without her."

The Portland Press accuses a Bangor

member of the Maine Legislature of

making seventeen speeches in one day,

and then jumping up and saying that

if members would only stop talking it

would expedite business, and reach a

final adjournment within a reasonable

time.

"Did you ever," asked a brother ho-

morist of Josh Billings, "stand at the

hall-door, after your lecture, and listen

to what the people said about it as they

passed out?" Replied Josh: "I did

—once, a pause and a sigh, but I will

never do it again."

HOW TO SELECT A HUSBAND.

It has been profoundly remarked that

the true way of taking a good stool from

a mushroom is to eat it; if you die it

was a good stool; if you live, it was a

mushroom. A similar method is em-

ployed in the selection of husbands;

marry him; if he kills you, he was a bad

husband; if he makes you happy, he is

a good one. There is really no other

criterion. As Dr. Samuel Johnson re-

marked: "The proof of the pudding is

the eating thereof." Some young men

that seem unexceptionable, indeed, very

desirable, when they are single, are per-

fectly horrid as soon as they get mar-

ried. All the latent brute there is in

the heart comes out as soon as a sensi-

tive and delicate being seeks her happi-

ness in his companionship. The honey-

moon lasts a very short time, the recep-

tions and the round of parties are soon

over, and then two sit down to make

home happy. If she has married a so-

ciety man, he will soon begin to get

bored; he will yawn and go to sleep on

the sofa. Then he will take his hat and

go down to the club and see the boys,

and perhaps not go home until morning.

If she has married a man engrossed in

business, he will be fagged out when he

comes home. He may be a sickly man

that she must nurse, and a morose man

that she must sit up for, a violent

man that she fears, a vulgar man for whom

she must apologize—in short there are

thousands of ways of being bad hus-

bands, and very few ways of being good

ones. And the worst of it is, that the

poor silly women are apt to admire in

single men, the very traits that make

bad husbands, and look with contempt

or ridicule upon those quiet virtues

which make home happy. Men with

very little personal beauty or style, often

make the wife happy—and sometimes

quite the reverse. The number of ways

of being a bad husband is almost as

great as the number of ways of being

ugly. No one can tell from the demean-

or of a single man what sort of husband

he will be. Meantime she must marry

somebody. Eat it; if you die it was a

sort of good stool; if you live it was a

sort of mushroom.

Few ladies have any idea of the num-

ber of miles they walk daily in going

about the house. The pedometer, a

little watch-like contrivance, which,

carried in pocket, feels each footfall

and records the total in miles and frac-

tions, reveals some extraordinary facts.

A lady, an acknowledged invalid, who

thought she saved every unnecessary

step, found that she had between break-

fast and tea walked nearly two miles

without going outside her door. The

pedometer would probably show that

nervous ladies, who "can't sit still,"

and are constantly "jumping up,"

to get this or that, walk at least five miles

a day about the house. What it would

show in the case of young ladies who

dance by the hour, yet are too delicate

to walk,

THE CHRONICLE.

BODIE, MARCH 8, 1879.

THE VETO.

As hinted in our last issue, we were not disappointed at the course of the President toward the Anti-Chinese bill, which was, at best, a hurried and ill-digested instrument, and has served but one good purpose, and we doubt if it had become a law it could have done more. The passage by both houses of Congress of any measure whatever, looking to the suppression of the evil, was a great moral victory, in view of the condition of public sentiment east of the Rocky Mountains. It must not be forgotten, however, that the loudest-mouthed advocates of the bill, were recent converts and at the same time Presidential or other aspirants for office and popular applause and favor in one form and another. As we stated last week, the bill was a direct violation of all diplomatic usages and a snub to the people that Americans had literally invited to these shores. It is possible, however, that the Chinese representatives at Washington are indisposed to hurry matters leading to an abrogation of the obnoxious features of the Burlingame Treaty, and this agitation and passage of a bill ignoring the treaty will hasten action all round. Taking this view of it, the action of Congress and Chief Executive altogether will have been a great step in the right direction, for where the direct and permanent welfare of the people is involved, sentiment should not stand in the way. Now comes the curious part of the business: To Kearney and his demonstrative followers, prompt action by the powers that be is largely due; yet they are the least disposed to criticize the action of the President. They consider the measure at best but a trifling with the subject; a sort of soothing syrup; where radical treatment alone would suffice. Kearney proposes a vigorous campaign within the lines of his own party, so that neither of the old organizations are likely to get any solid comfort or glory out of the bush of his beating. The ways of politicians are anything but paths of pleasantness or peace. In Bodie, where a few of her people have named the President in effigy, the few Chinese are universal in expressions of disappointment, as well, for they were in hopes that the further influx of their countrymen would be stopped, and that their wages would thereby be increased.

BODIE STOCKS.

As mining is conducted on this coast, the stock market is a leading and extremely important adjunct of the business. By this means, money is chiefly raised with which to prospect ground that could not be developed by individuals. The fluctuations are a constant source of excitement and enjoyment, even, to the mass of people of all classes. It may not be an elevating or ennobling exercise of the financial faculties, but it has become such a second nature, almost, that we believe this gambling element of our people alone is strong enough to defeat the new Constitution to be submitted in May next.

But the question is—what of Bodie stocks? Where will the lightning strike next? A score of claims are opened to such an extent, that but a few feet of drifting here and there is likely to expose a bonanza that will set all hands as wild as in August last. It will not require so extensive a find as that in the Bodie claim, to set off a perfect bonfire of speculation; for the district has acquired almost as solid a history for rich ore discoveries, over a wide field, as the Comstock country itself. This is a view it were well for all to bear in mind.—The Sierra Nevada deal raged furiously, all will recollect, yet even then it was all it could do from keeping the Bodie stock from going to as high figures, where, on merit, it was a thousand fold more deserving to reach. There is nothing on the line of the great lode today that shows half so favorably as some of the Bodies we could name.

Coming down to particulars, it is difficult to account for the action of the market at any time, almost, but there are occasions when it is more puzzling than would please a Philadelphia lawyer. The case of Blackhawk, for instance, during the past fortnight. The many versions of that story would require a column to outline, to say nothing of particularizing; yet the mine is looking better all the time, with the stock dragged back to previous figures. We look for a big paying mine underlying the main Standard lode, and in which the Summit and Blackhawk will largely share; and the stock a perfectly safe investment. A few weeks in one case and a month or six weeks in the other, will better tell the story as to extent, but there is enough in sight to warrant even sanguine predictions.

It appears that the Chinese in Sacramento are dissatisfied with the veto of the Chinese bill. They say that there are too many Chinamen here. So say we all.

During the past twelve months only 44 fires occurred in Sacramento. The loss was \$42,055; insurance, \$145,516.

The Constitutional Convention adjourned sine die on Monday last.

THE BODIE MINES.

Progress of Development During the Past Week.

The little flurry in the stock market may be compared to a March squall of weather, and the district must rely for the time on its actual developments, and perhaps to some new and striking development in an entirely new quarter, for a real "Spring rise."

It begins to look as if

THE STANDARD

were to open up bonanzas as big as those of Con. Virginia and California, that it would not attract any special attention. Every visit paid to this great property adds weight to that opinion. A hurried look yesterday at the faces of the drifts on the Bruce (Cook) and Burgess lodes, as they strike north out of the Bodie claim, was more reassuring than ever before. The Bruce drift is now over 300 feet in length, showing in the face gold strata and clean quartz throughout. The whole face and formation seem to be more favorable than at any time since the ledge left the Bodie ground. The Burgess, usually so broken as to walls and mixed as to vein matter, hints at a new departure, a showing of solid quartz two feet in width, in better walls, appearing in the bottom and east side. The ore has not changed its character for high grade. This ledge is drifted a distance of 200 feet. The 200 feet drift south on a ledge passed a few feet from the new shaft in the crosscut east, is looking as though it were making for the Bruce and Burgess region and with the like promising results. It is impossible to go over a mile and a half of exploration incident to this storehouse of bonanzas, in a review of this kind. The old chief lode is a ways there to speak for itself. The many new mines of importance being constantly brought to light, however, require fresh efforts at description. A visit to

THE BODIE MINE

yesterday was well repaid, as all stories about the complete exhaustion of the ore in the upper levels are disproved by the fact that some 45 to 50 tons are daily shipped to the Syndicate Mill, and there is more in sight. An east crosscut has been started from the 400 level in the new shaft; it is in a distance of 50 feet. The formation is very much mixed with clay. Work is renewed on the old crosscut, 250 level, west, which cut the Bruce, etc., and rendered the mine famous. It is 97 feet from the Burgess, to the Bulwer line, and this work will probably be extended to that point.

THE BULWER

is showing favorable as usual on the 350-level, the crosscut from the Homestake west showing favorably with respect to the continuance down of the Stopewall. The Bodie Mill has been running on ore from this mine, since the 1st instant, and by another week some report of progress and probable results should be obtainable.

THE BLACKHAWK

has rather strengthened as the stock weakened. The south drift on the Warren lode—about which the stock market revolved so suddenly and rapidly—is in good ore a distance of 18 feet, the porphyry mixture growing soft and narrower. The ledge north of the crosscut is drifted on 7 feet, and is all in good ore. Free gold is readily obtained in either drift. The crosscut is slowly extending west toward where the Summit lode is supposed to be; a week more will tell a good deal more about this. The rock is extremely hard west of the Warren. By Tuesday, the main shaft will be down and timbered to the 320-level, when new crosscuts, etc., will be started. It is in a very soft vein formation that prospects well in places. A ladder way from top to bottom will be completed to-day, rendering the mine safer and in better shape for work.

THE SUMMIT

is now under full headway, the station at the 200-level in the incline shaft being completed, from which point the work of sinking the shaft to the 450-level will go on without intermission. Drift south on ledge from said station is in over 100 feet; that north about 30; vein of usual size.

THE TIGRA

will have new shaft finished to the 520 level in a few days; it was within 2 feet of 500 yesterday. At the 520-level, extensive exploration of the whole claim is contemplated. Encouraging prospects are found in a two foot ledge drifted upon 40 feet north of the east crosscut on the 320 level, and 54 feet from shaft. It looks as if there was a rich ore body north, with signs of increasing size. The writer was present when rich prospects were horned out yesterday.—The east crosscut in the 420-level is in 105 feet; rock hard. The Tigra works are altogether getting to be so extensive that justice cannot be done to its many ledges in such limited space.

CON. PACIFIC.

Going west of the Bulwer, on the main bluff, the Con. Pacific Company are pushing down their new double compartment shaft, and work on the winze in ledge No. 2 is unusually active. The latter is down 66 feet on line of ledge, which holds its own in size and quality. The shaft is well located for good prospects in the south end of claims.

THE MONO

is prospectively one of the particularly interesting claims, and work is progressing rapidly and systematically. From the 400-level, a drift is run north 125 feet to the Bodie line, where a turn-table is about finished with a view to extensive crosscuts east and west.

THE BACHTZ

if temporarily bothered with water on the 700-level. A large new bucket is about ready for raising it, and within a week or so there will be something more valuable to see down there than water.

THE MCCLINTON

has made the usual progress, and the Syndicate programme at the extreme north end is carried along as regularly as clockwork—the main tunnel being extended south over 2,000 feet, the west crosscut for the Osceola and the winze nearing a connection.

GOING SOUTH.

There is nothing special to report in the Dudley, Goodshaw, Addenda, or South Bodie. East crosscut, 450-level in Goodshaw, is 72 feet in length, cutting stringers of quartz; rock soft; west crosscut, 45 feet, in hard rock. Addenda work is confined to going deeper with shaft. The South Bodie shaft is down 475 feet; is not out of the white cap formation yet.

THE RED CLOUD.

is on the eve of cutting the Packard-Morton ledge on the 400-level, in crosscut west, 97 feet. Drift south on main Red Cloud ledge, same level, is improving.

THE NORTON.

has cut out station on 200-level, and started crosscuts both east and west—former run 15 feet, cutting vein. Vein in shaft, 2 feet wide, assaying high. The drift south, 200 level of the Book or, shows better vein matter, and generally the mine looks very favorable.

In the University, there is little change to note; work progressing as usual. The same may be said of the Richer. In the Queen Bee, 250-level, there is seen a formation new to the district—it is quite like the grayish blue vein porphyry of the Comstock. A good 2 foot ledge has been crosscut east about 45 feet. It is a fair milling assay. The foregoing is in brief the present showing of all the leading claims, so far as special interest applies. Of the minor claims, much of interest could be said but for want of space.

NEW TO-DAY.

I. O. O. F.

THE INSTALLATION OF THE OFFICERS of Lodge No. 27, will take place in Miners' Union Hall on Wednesday evening, March 12th, 1879, at 7:30 o'clock. All Odd Fellows with their families are invited to be present. A social dance will take place at the conclusion of the ceremony. Odd Fellows wishing to invite friends can obtain invitations by applying to C. W. Sullivan, at the Postoffice, or of Dr. M. J. Roe, at his office.

THE CHRONICLE.

BODIE, MARCH 8, 1879.

County Official Press.

LOCAL AGENT.—W. H. Ellis is authorized to receive subscriptions and advertisements for the CHRONICLE.
D. R. Peier, at Bryant's store, Bridgeport.
Joseph Carney, Colville.

LOCAL INTELLIGENCE.

The CHRONICLE Office is on the second floor of "Goodson's Building," east side of Main street, between Standard Avenue and Green street.

Job Printing.—Job printing of the finest descriptions will be furnished at this office at Sacramento prices.

FIRE MATTERS.—On Sunday last a meeting was held for the purpose of organizing another fire company, and adopt measures to guard against fires. A number were enrolled for an engine company, some having been members of the New York, Brooklyn, Sacramento and San Francisco Departments. The most favorable plans discussed were the building of 15,000-gallon reservoirs at the intersections Main and cross streets, and the procuring of a hand-engine, hose, hooks, ladders and buckets. It is incumbent upon our people to commence at once to protect the town from destruction by fire, and the fate of Reno should be a warning and incentive to energetic action. The owners of property contiguous to the above crossings ought to build the cisterns, and the holders off of these lines contribute to the purchase of an engine, etc. There are many reasons to induce citizens to become firemen. Self-preservation, exemption from jury and military duty, and poll, road and hospital taxes are of great importance to all classes. A meeting will be held at the engine house, to-morrow afternoon at 3 o'clock to continue the good work. All are invited.

BOARD OF SUPERVISORS.—The Board of Supervisors met in special session on Monday, March 3d, 1879.

Present, Shaw and Goodell.
John Welch and Jesse McGrath were appointed Commissioners to view and report on Daniel Olson's road from Bodie through Rough Creek Arroyos.

Report of Commissioners appointed to view the East Walker, Big Meadows and Bodie Toll Road, was accepted, and the rates of tolls fixed the same as formerly.

Report of viewers of Garretson's road from near Owens' Lake to Lake District accepted and tolls fixed.

Contract for stationery and blanks was awarded to A. L. Bancroft & Co.

Contract for county advertising, election posters and Great Register was awarded to R. M. & A. C. Folger.

Contract for feeding county prisoners was awarded to Mrs. Ann Summers.

The Board then adjourned sine die.

NEW COMPANIES.—The following new companies have been incorporated to operate in Mono county:
McKinley Consolidated Gold Mining Company, to operate in Bodie District. Capital, \$100,000, in shares of \$100 each. Directors—L. W. Gastlyer, T. H. Lawler, Wm. H. Sharp, E. B. Clement and W. H. V. Cronise.

INSTALLATION.—The officers of Bodie Lodge No. 279, I. O. O. F., will be installed, at Miners' Union Hall, on next Wednesday evening, 12th inst. At the close of the ceremonies a social dance will follow. We acknowledge receipt of a complimentary invitation card.

NEW TO-DAY.—Under New To-Day will be found the advertisements of Robson & Forrester—Blacksmiths; Bodie Lodge, I. O. O. F.—Installation of officers; Wanted—situation by Miss Lynch, of San Francisco.

I. O. O. F.—The following officers will be installed on Wednesday next: Frank E. Willard, N. G.; E. H. Langley, V. G.; M. Roe, M. D.; R. S.; R. H. Wear, P. S.; T. J. McDonald, T.

RELIGIOUS.—Rev. G. B. Hinkle will hold divine service at the School House to-morrow evening at 7½ o'clock. Sunday School at 2 o'clock p. m. All are cordially invited to attend.

INCA.—This claim, on Silver Hill, near the Addenda, is down thirty feet. Work will be resumed within the next ten days. This is considered a good claim.

ALL RIGHT.—It appears that Deputy Coroner Cameron's appointment is according to the Code, and Coroner Yanez, having taken legal advice, continues Mr. Cameron in office.

OFFICIAL PRESS.—The Board of Supervisors has designated the Mono Arizona CHRONICLE as the County Official Press.

BULLION SHIPMENTS.—This day the Standard Company shipped Bar No. 115—\$19,529.91, and the Bodie shipped No. 89—\$6,275.01. Total, \$25,804.92.

THE WEATHER.—The weather this week has been equally.

AN IMPORTANT VISIT.—On Tuesday last, William M. Bunker, the leading spirit and proprietor of the S. F. Daily Stock Report, returned to the city, after a ten days' sojourn in Bodie. This was his first visit to this district; and every thing being new to him, he entered into the work of obtaining practical information concerning the mines, with his usual energy and thoroughness, amounting even to enthusiasm. His notes regarding the past, present and prospective interests of the district were almost exhaustive of that subject, and we venture the prediction that their publication will open the eyes of a thousand doubting Thomases, and be of lasting value to this section of the State. Mr. Bunker had rare facilities for obtaining reliable information, and that he availed himself freely of the opportunity, we have personal knowledge. The weather was exceptionally agreeable during his stay, so that there was nothing lacking to render his visit pleasant as well as practically important, and we hope and expect to see him repeat the same at regular intervals. His notes, in popular form, will probably appear in his pages the first of next week, and will serve as a fresh handbook, as it were, to this district, and copies can be obtained at Ellis News Depot.

HAYES IN EFFIGY.—On Thursday evening a few of our more enthusiastic anti-Chinese people hanged and burned President Hayes in effigy. This sort of proceedings has occurred in other localities than Bodie. It may be in place to say that where the Chinese element is the greatest curse on this coast—San Francisco; and where riot and bloodshed were feared as the result of the veto, indignation has been the least demonstrative. In Bodie, perhaps, the presence of the mongolians is the least injurious of any place on the coast. We are not disposed to thank the Chief Executive for his treatment of the bill, or condemn the Bodie people for this act; but merely set forth the enmities and enigmatic characteristics of political or popular demonstrations. Whether the President has ever heard of Bodie, there is no doubt that Bodie has heard of Hayes, and that the dozen or two moon-eyed laundries of Bodie are expected "to go."

MINING LOCATIONS.

The following locations have this week been recorded by District Recorder George Macartney.

Defiance.—1,500 feet, east slope of Silver Hill, parallel with Defiance Nos. 2 and 3, south of Dudley shaft. John Gildea, Frank Olsen and Geo. McCartney.

Satura No. 2.—1,500 feet, south of Great Republic. James H. and Frank Tippet.

Emigrant.—1,500 feet, east side of Main street, 800 feet south of Miners' Union Hall. A. A. Cammeron.

HELD TO ANSWER.—The examination of Henry Hiel for the killing of George H. Taft closed to-day, Justice Peterson holding the prisoner to answer on the charge of murder, and remanding him to the custody of Deputy Sheriff Massey to be taken to Bridgeport. Too much praise cannot be bestowed upon Judge Peterson and his officers, for the fidelity to the law-abiding people, as evidenced during this protracted and tedious inquiry. The signs of the times are that the people will examine and settle such affairs without expense to the county.

PERSONAL.—Hon. R. M. Briggs, Register of the U. S. Land Office, returned from Jackson, on Wednesday last, with improved health. Senator William M. Stewart and wife are here on a brief visit. This week we were favored with calls from Judge Owens, of Hollister, and Dr. B. F. Pender, of Sacramento, both of whom intend to remain here.

MORNING NEWS.—The Bodie Morning News appeared this morning, and presents a neat appearance; well-filled with good reading matter and advertisements and only lacks telegraph news to make it a "live daily"—an unknown, but much needed article in Bodie. It has our best wishes.

DECEASED.—We regret to announce the death of Jackson, yesterday morning, of Charles, son of R. M. Briggs.

On Sunday morning last, at seven o'clock, a fire, caused by ashes being deposited near a woodpile, destroyed ten blocks of buildings in Reno, involving a loss of six lives and \$1,000,000. The insurance amounts to \$250,000.

Chew Jackson's Best Sweet Navy Tobacco.

NOTICE TO CREDITORS.

JOHN L. BERRY, of Bodie, Mono County, California, having this day filed his petition in insolvency, it is hereby ordered that the creditors of said insolvent appear before me on the 18th day of March, A. D. 1879, at 2 o'clock in the afternoon of said day, to show cause, if any they have, why an assignment of the insolvent's estate should not be made, and his discharge from insolvency. And it is further ordered that all proceedings against the debtor be stayed.

H. S. LEAVITT, County Judge of Mono County. Bridgeport, Mono County, California, February 11, 1879.
Attest: D. JEFFREYS, Clerk. f15-4f

BODIE, MARCH 6 1879.

Who Wouldn't Be a Heathen?

Mamma, I wish I lived away,
Across the great big sea,
Where little heathen children play,
And then how happy I should be!

I wish you'd be a heathen, too,
And then we all could have some bread,
And good warm clothes for sister Sue,
And brother Willie who is dead.

I'd go and find his little grave,
And tell him to come home again;
And bread and little shoes he'd have,
And he would thank his sister Jane.

And folks would come to see you, then—
Mamma, you look so sick and pale—
And bring some bread and butter, when
They heard my sister's dying wail.

Mamma, can't Christians beheaden shed
Except on heathens? Can they give
To sister Sue and me some bread,
And let our little daughter live?

I went to church to-day and heard
The preacher for the heathen pray;
But not the first imploring word,
For hungry little Christians say.

My little dress was worn and thin,
And I sat shivering in the cold;
While all the other girls put in
The box their shining suns of gold.

They told me that this was to buy
For little heathen girls some bread;
Oh, mamma, how I wish that I
Could be a heathen and be fed!

They laughed at my old faded dress,
And put on many naughty airs;
I thought of God in my distress,
And hid my face and uttered prayers.

Mamma, shan't we be heathens, too,
So we can have some clothes and bread;
I and my little sister Sue,
And brother Willie who is dead.

WEDDING JOURNALS

The practice of newly-wedded couples going to a hotel immediately after the marriage ceremony has become so common as to have almost to have superseded the old-time wedding tour. Nowadays public marriage ceremony in upper New York is not considered complete until the couple have driven to the nearest fashionable hotel, and have passed at least a week within its walls. This is especially true of what are known as evening weddings—those held in some notable churches, and followed by a crowded reception in the bride's home. After the last congratulations have been exchanged, the bride and bridegroom thread their way through the throng of black attired men and bejeweled ladies under the arched way, which the thoughtful master of ceremonies has provided, until they reach their coach. In hanging the door the head usher takes care to utter in a stage whisper: "Drive to the Pennsylvania depot," or the "Grand Central" as the case may be, and the throng return, imagining that the honeymoon is to be spent in Philadelphia or Boston. The carriage has gone hardly a block before down goes the window, and the driver reins in his horse as he hears:

"Where did they tell you to go?"
"To the Pennsylvania depot, sorr."
"Pennsylvania depot? Pahaw! Drive to the Buckingham."

And to the Buckingham they were whirled accordingly. For years this clever little deception has been practiced by young bridal couples, without any one except the proprietors and the coachman being in the secret. Of late, however, the practice has become so popular and so widely known that the affectionate of a wedding is only kept up for the sake of appearances. "Philadelphia" and "Boston," in the vocabulary of Hymen, have come to mean "Windsor" and "Buckingham."—N. Y. Sun.

During a marriage ceremony a Western girl, when asked whether she would "have this man to be her wedded husband," distinctly answered "No." She had just detected the fumes of whisky in his breath. This incident teaches that—well, it teaches several things. A young man should not drink whisky. It shatters the constitution, reddens the nose, and—beer is cheaper, anyhow. It also teaches the value of cloves and cardamom seeds. A simple little clove, put where it will do the most good, might have made that young man happy three months—and the girl wretched the remainder of her life.

The study of the Irish language is vigorously prosecuted in New York. In Brooklyn, classes, comprising both sexes, meet two or three times a week, and a considerable number of Germans and Hebrews are taking it in.

Boston women are beginning to follow Princess Louise's fashion of carrying a small cane. Women must have something to fondle.

The reputation a man gets from his ancestors often wants as much altering to fit him as that old clothes would. It is truly thus.

The boudoir fan is something new, and conceals among its intricacies a powder puff and powder, as well as a tiny ivory comb.

No matter how hard it is to find a rocking chair during the day, a man is sure to fall over one when he is in search of a match box after dark.

Many English sailors will not whistle at sea for fear of a storm.

-IS-

THE EASIEST SELLING,

THE BEST SATISFYING

Sewing Machine

Its introduction and World-renowned
reputation was the death-blow to high-
priced machines.THERE ARE NO SECOND-HAND
WHITE MACHINES IN THE MARKET.

This is a very important matter, as it is a well-
known and undisputed fact that many of the so-
called first-class machines which are offered as
cheap now-a-days are those that have been re-
possessed (that is taken back from customers
after use) and rebuilt and put upon the market
as new.

WHITE IS THE PEER OF ANY SEWING
MACHINE NOW UPON THE MARKET.
IT IS MUCH LARGER THAN THE FAMILY
CHIMES OF THE SIMMER, HOME AND NEED
MAKE.

IT COSTS MORE TO MANUFACTURE THAN
EITHER OF THE FORESAID MACHINES.
ITS CONSTRUCTION IS SIMPLE, POSITIVE AND
DURABLE. ITS WORKMANSHIP IS UNSURPASSED.

Do not Buy any other before try-

ing the WHITE.

Prices and Terms Made Satisfactory.

Any person who will
send me a list of the names of reliable persons of their
residence who wish to purchase an instrument,
either Piano or Organ, I will send my best endeavor
to sell them one, and for every Piano I succeed in
selling to these list within one year, I will credit them
with \$10, and for every Organ \$5, to be applied on
payments to a sum sufficient to pay for any in-
strument selected at the list, or I will pay the price,
and I will then ship them the instrument.
I will credit them with the amount of the price,
and I will then ship them the instrument.
They need not be known in the market, as I shall make
special efforts to them, filling a superior
instrument for from one-half to two-thirds less
than at retail, and after you have made inquiry, you
can add to it. Illustrated Newspaper sent free. Ad-
dress DANIEL F. BEATTY, Washington, N. J., U. S. A.

United States of America.

BEATTY PIANO

There is no manufacturer of Pianos and Organs in
this or any other country who has received as many
unqualified endorsements as has D. F. Beatty. From
every State and Territory comes the prompt re-
sponse: "They are the best in the world." CAUTION!
My success has brought into existence hundreds of
imitators, some of whom have formerly been in my
employ, whose want of experience is evident to those
who are capable of judging. Illustrated Newspaper
sent free. Address DANIEL F. BEATTY, Wash-
ington, N. J., U. S. A.

MEDICAL.

DR. SPINNEY

No. 11 Kearny Street,

Treats all Chronic and Special

Diseases.

YOUNG MEN

WHO MAY BE SUFFERING
From the effects of early indiscretion,
disorder, will do well to avail themselves
of this, the greatest boon ever laid at the altar
of suffering humanity. DR. SPINNEY will
guarantee to forfeit \$500 for every case of Seminal
weakness or private disease of any kind or
character which he undertakes and fails to
cure.

MIDDLE-AGED MEN.

There are many at the age of thirty to sixty
who are troubled with the frequent evacuation
of the bladder, often accompanied by a slight
stinging or burning sensation, and a weaken-
ing of the system in a manner the patient can
not account for. On examining the urinary
deposits a very sediment will often be found,
and sometimes small particles of albumen will
appear, or the color will be of a thin milky
hue, again changing to a dark and torpid ap-
pearance. There are many men who die of
this difficulty ignorant of the cause, which is
the second stage of seminal weakness. DR. S.
will guarantee a perfect cure in all such cases,
and a healthy restoration of the genito-urinary
organs.

OFFICE HOURS—10 to 4 and 6 to 8. Sunday
from 10 to 11 A. M. Consultation free. The
careful examination and advice, \$2.
Call or address.

COPP'S HAND BOOK

OF

MINING LAWS,

OF JUST PUBLISHED.

A work needed by every Miner, Prospector,
Speculator, Agent, Attorney, Recorder,
Broker, and Business man in the
Mining States and Territories.

Price only \$1 00.

Price only \$1 00

A COMPLETE, HANDY REFERENCE
Book on all questions under the United
States Mining Laws. The latest reliable work
extant on the subject.

READ ITS CONTENTS AND SEND FOR
A COPY.
ALL YOUR ENTERPRISING FRIENDS WILL
HAVE IT.

CONTENTS.

1. The United States Mining Laws and
Land Office Instructions thereunder.—
Each section of the law is immediately follow-
ed by the Land Office Instructions relating
thereto. This is a convenient arrangement as
it avoids turning several pages when the in-
structions are considered in connection with
the law.

2. A Digest of all the decisions under the
Mining Laws now in force. It is brought down
to date of publication, and containing the lat-
est decisions, takes the place of all prior pub-
lications.

3. New and Improved Forms for mak-
ing the various proofs, from the location of a
claim miner's lien, notice to delinquent ow-
ners, &c., down to leases of land.

4. A Complete List of Patented Mining
Claims, arranged by State, Territory, County,
and District. This list is worth to mining men
many times the price of the book.

The book contains nearly 300 pages 4 1/2 by 8
inches, and is designed to be a pocket compa-
nion for every wide-awake in the mining
camp and financial centers of the West. The
work is for sale at the
